

Datenblatt piA-AM335x-SK

piA-AM335x-SK

Features

- Starter kit for piA-AM335x processor modules
- Socket for micro SD card
- 1x Ethernet 10/100 Mbit
- 1x CAN bus connector
- Debug Terminal via the mini-USB Virtual COM Port
- Reset button
- Button for selecting the boot device
- Power supply 5V
- small form factor 67 x 57 mm
- 44-pin expansion connector

Overview

piA-AM335x-SK is a starter kit for the development of embedded systems and mobile devices. It contains all the necessary hardware and software functions for the commissioning of piA-AM335x processor module.

piA-AM335x processor module can be attached to this base board via two 100-pin connectors.

This starter kit supports standard interfaces such as Ethernet 10/100 Mbit, USB and CAN bus. Via an expansion connector, 44 processor signals are directly accessible from the outside.

This base board provides a low-cost and flexible introduction to the development of Linux-based devices. For larger quantities it can be modified to customer specifications.

Applications

- Industrial Automation
- Medical Technology
- Data logger
- Industrial process and control

Advantages

- Accelerated development of your product
- Numerous applications due to high number of configurable interfaces
- Quick and easy system integration

Technical Data

Basics

Dimensions	67 x 57 mm
Power Supply	5V $\pm$ 5%
Temperature Range	-40°C - +85°C

Interfaces

Ethernet	1 x 10/100 Mbps Ethernet MAC
USB	2 x USB Ports
SD-Card Host	for μ SD-Card
CAN-Interface	1 x CAN
Debug-Terminal	via Mini-USB Virtual COM-Port
Button	1 x Reset 1 x button for selecting boot device

In addition on the module*

Processor	Sitara™ AM335x ARM Cortex-A8 microprocessor (MPU)
RAM	up to 512Mbit DDR3 SDRAM
Flash	up to 16 GB eMMC, 128Mbit NOR Flash, FRAM
LED	Status LED Power Good LED
RTC	Real-time clock

*Processor module piA-AM335x-PM can be purchased separately.
